Course Attribute Dashboard (CAD)
RACRA Registrar Break Out
September 29, 2021

Initiative Focus

- Improve efficiencies for faculty and staff in order to create high quality, consistent data related to assignment of USG and campus course attributes

- Provide a configurable, stream-lined approach for faculty and staff to initiate, approve, and review requests to assign attributes to course sections

UNIVERSITY SYSTEM OF GEORGIA

Just So You Know…

- Faculty on your campus involved in HIPs work, teaching study abroad courses, low-cost/no-cost courses, etc., have been made aware of the CAD via multiple workshops and meetings

- CAD can be used to enhance your current process for adding course attributes to course sections

UNIVERSITY SYSTEM OF GEORGIA

Just So You Know…

- Campuses have some variability in how they configure the look/feel in Banner 8 SSB

- Solution will eventually be developed using the new Banner 9 SSB user interface

- Each dashboard section (Courses to Review, Courses to Maintain, Courses to Approve) displays regardless of your role, on one page

- End users will only see data in dashboard sections if they have been configured to do so

UNIVERSITY SYSTEM OF GEORGIA

Decisions, Decisions

- KISS principle: most systems work best if they are kept simple

- Pilot group – one school, department, or discipline

- Ownership of administration, maintenance, change management, etc.

UNIVERSITY SYSTEM OF GEORGIA

Set Up 101

- Use the GeorgiaBEST <u>Course Attribute Dashboard Workbook</u>

- Remember – KISS principle
  - Map roles carefully, *start small*
  - Same with attribute groups

UNIVERSITY SYSTEM OF GEORGIA

User Roles

- *Global Administrator*

- *Group Administrator*

- *Approver*

- *Maintainer*

- *Reviewer*
