DATA-DRIVEN COURSE DESIGN

eCore completed its initial phase of Course Analytics reviews in Spring 2023.

- Course Data Analytics reports provide a comprehensive overview of key performance metrics including longitudinal analysis of enrollment trends, final grades, ABC/DFW%, and detailed LMS gradebook data with comparative benchmarks.
- Course Data Analytics also summarize the course revision history and include suggestions for needed revisions with a proposed project plan.
- Reports will be released to the eCore RAC for review and approval prior to new course revisions.
- Faculty feedback will be collected from active eCore instructors, SMEs and subject-matter RACs throughout the academic year.

Course module surveys are now embedded in every eCampus section in GoVIEW for Spring SS2
