| <p><b>Description</b></p>              | <p>This topic demonstrates how to create a Purchase Order online. Purchase Orders can be created in three ways – by starting with an entirely new Purchase Order, by copying an existing Purchase Order, or by copying an existing Requisition. This topic demonstrates all three methods.</p> <ul style="list-style-type: none"> <li>• The statuses of a Purchase Order are Initial, Open, Pending Approval, Approved, Dispatched, Canceled, and Complete.</li> <li>• Purchase Orders consist of a Header, Lines, Schedules, and Distributions. The Header section contains vendor information. The Line section contains information about the goods or service purchased. The Schedule section contains Ship To information. The Distribution section contains the accounting information.</li> <li>• Defaults can be created for the Lines, Schedules, and Distribution sections. These defaults override the defaults set at the Business Unit, Buyer, or Vendor levels, and also become the default when no information is entered in a field. PO Defaults page can be overridden at the line level.</li> <li>• Purchase Orders that have been entered manually remain in Initial status until a Buyer has been associated to the Purchase Order. Once a Buyer is identified, the Purchase Order is set to Open or Pending Approval status, depending on the Buyer's defaults</li> </ul> |

## Procedure

In this topic, you will create Purchase Orders using all three methods – by entering each field manually, by copying an existing Purchase Order, and by copying an existing Requisition.

When entering all the fields, you will create a Purchase Order for a desk costing \$1200. When copying an existing PO, you will change the first line from “Chair” to “Blue Pens” and the second line from “Chair Mat” to “Dry Erase Markers”. You will also change several things on the PO Defaults page to create the new Purchase Order.

When copying an existing Requisition, you will change the line information from 10 to 12 pallets of sod at \$165 per pallet. Even though this example only changes line information, it is possible to also change distribution and schedule information.

| 91.  | <p>Congratulations. You have just completed the <b>Adding/Updating a PO Online</b> topic. Below is a summary of the key concepts of this topic:</p> <ul style="list-style-type: none"> <li>- The statuses of a Purchase Order are Initial, Open, Pending Approval, Approved, Dispatched, Canceled, and Complete.</li> <li>- Purchase Orders consist of a Header, Lines, Schedules, and Distributions. The Header section contains vendor information. The Line section contains information about the goods or service purchased. The Schedule section contains Ship To information. The Distribution section contains the accounting information.</li> <li>- PO Defaults can be created for an individual Purchase Order. These defaults override defaults set up at the Business Unit, Buyer, and Vendor levels. They also become the default when no information is entered in a field.</li> <li>- PO Defaults page can be overridden at the line level.</li> <li>- Purchase Orders that have been entered manually remain in Initial status until a Buyer has been associated to the Purchase Order. Once a Buyer is identified, the Purchase Order is set to Open or Pending Approval status, depending on the Buyer's defaults.</li> </ul> <p><b>End of Procedure.</b> Remaining steps apply to other paths.</p> |
| 92.  | Click the <b>Look up Vendor ID (Alt+5)</b> button.   |
| 93.  | Enter " <b>landscape</b> " in the <b>Short Vendor Name</b> field.  |

| Step | Action   |
|------|--|
| 94.  | Click the <b>Look Up</b> button.   |
| 95.  | Click an entry in the <b>Short Vendor Name</b> column.   |
| 96.  | Enter " <b>Sod order</b> " in the <b>PO Reference</b> field.   |
| 97.  | Click the <b>Copy From</b> list.   |
| 98.  | Click the <b>Requisition</b> list item.  |
| 99.  | Click the <b>Search</b> button.  |
| 100. | Click the <b>Select</b> checkbox next to the line(s) you wish to copy into the PO.   |
| 101. | Click the <b>Copy To PO</b> button.  |
| 102. | Enter " <b>12 Pallets of Sod</b> " in the <b>Description</b> field.  |
| 103. | Enter " <b>12</b> " in the <b>PO Qty</b> field.  |
| 104. | Click the <b>UOM</b> button.   |
| 105. | Click on " <b>EA</b> " in the <b>UOM</b> list.   |
| 106. | Enter " <b>165.00</b> " in the <b>Price</b> field.   |
| 107. | Click the <b>horizontal</b> scrollbar.   |
| 108. | Click the <b>Save</b> button.  |
| 109. | In this scenario, only item information was changed; however, if changes are needed elsewhere on the document such as PO Defaults, Distribution Lines, etc., these changes can be performed and saved in the new purchase order. |
|      | <b>End of Procedure.</b>   |
